f. Authority to collect information. A Federal law, Executive Order of the President (EO), or DoD requirement must authorize the collection and maintenance of a system of records.

(1) If this system has a Privacy Act SORN, the authorities in this PIA and the existing Privacy Act SORN should be the same.

(2) Cite the authority for this DoD information system or electronic collection to collect, use, maintain and/or disseminate PII. (If multiple authorities are cited, provide all that apply.)

(a) Whenever possible, cite the specific provisions of the statute and/or EO that authorizes the operation of the system and the collection of PII.

(b) If a specific statute or EO does not exist, determine if an indirect statutory authority can be cited. An indirect authority may be cited if the authority requires the operation or administration of a program, the execution of which will require the collection and maintenance of a system of records.

(c) DoD Components can use their general statutory grants of authority ("internal housekeeping") as the primary authority. The requirement, directive, or instruction implementing the statute within the DoD Component should be identified.

g. Summary of DoD information system or electronic collection. Answers to these questions should be consistent with security guidelines for release of information to the public.

(1) Describe the purpose of this DoD information system or electronic collection and briefly describe the types of personal information about individuals collected in the system.

The purpose for collecting PII information is to track patients status during visits to Military Treatment Facilities (MTFs) Emergency Department (ED). The information tracked includes: time thresholds (in and out of the ED), orders associated with a patients visit to the ED (labs and x-rays), providers assigned to the patient and bed assignment. This helps supervisors to assess the efficiency of the ED at MTFs. The type of personal information collected is name, social security number, gender, date of birth, marital status and medical information.

(2) Briefly describe the privacy risks associated with the PII collected and how these risks are addressed to safeguard privacy.

Risks include unauthorized access to PII, inaccurate information in the system, and unauthorized disclosure of PII. These risks are addressed by the following:
1) The system will have role-based access;
2) PT TRAQ is pulling data from other systems and the information is matched via SSN. If there is not a match, data is not used; and
3) Appropriate safeguards are in place to minimize the possibility of disclosure. The database is physically housed in an access-controlled server room and appropriate application level security is in effect.
